

I claim:

- 1           1.       A method for creating a multimedia presentation, which presentation
- 2 comprises an audio or video recording of a session wherein a presenter presents an
- 3 audiovisual presentation, said method comprising:
- 4           (i) said presenter presenting said audiovisual presentation,
- 5           (ii) making an audio or video recording of said presentation,
- 6           (iii) wherein timing data comprising data for start, end and transition events within
- 7 said audiovisual presentation are automatically, and without manual processing, incorporated
- 8 into said audio or video recording, so as to allow said events to be used on playback to
- 9 coordinate the audio or video portion of said multimedia presentation with the audiovisual
- 10 portion thereof.
